VevoLyte

DIETARY FEED SUPPLEMENT FOR THE BALANCE OF WATER AND ELECTROLYTES

VevoLyte is a **water soluble dietary feed supplement** for neonatal calves and lambs which are suffering from digestive problems (Diarrhoea).

Used for oral rehydration therapies and designed to improve acid-base balance by providing electrolytes and water. Neonatal calves and lambs diarrhoea is a major cause of death and economic loss in the dairy industry.

Causes of diarrhoea can include changing brands of milk replacer, changing from waste milk to milk replacer, transport, weather, vaccinations, dehorning, illnesses etc.

VevoLyte is rich in **dextrose, glycine, vitamins, trace elements and tannins**.
Can be used in conjunction to veterinary therapy.

Application/Feeding Directions:

- 1.25gr VevoLyte per kg of body weight twice a day for 3-5 Days.
- Mix in 2 litres of warm water, milk or milk replacer at approximately 40 °C.

Ingredients:

- Vitamins, Minerals, Choline Chloride, Sodium
- Chloride, Sodium Bicarbonate, Calcium
- Propionate, Glycine, Aroma, Protein Source,
- Inactive Yeast, Dextrose, Tannins.

Analysis of Ingredients:

- Ash 27.23%
- Calcium 0.24%
